

thumbnails

```
type: Boolean or String  
default: true
```

Sets the creation of thumbnails. If false, Galleria will not create thumbnails and no carousel.

- If you set this to '**empty**', Galleria will create empty spans with the className `img` instead of thumbnails.
- If you set this to '**numbers**', Galleria will create empty spans with numbers instead of thumbnails.
- If you set this to '**lazy**', Galleria will create empty images with the class 'lazy'. You can then call `loadLazyThumbs()` to load the thumbnails at run time.

Example on how to create numbered elements instead of thumbnails

```
<script>  
Galleria.configure({  
    thumbnails: "numbers"  
});  
</script>
```
